Unparalleled teaching support

- Fully redesigned and reimagined lecture PowerPoint slides are visually rich with a focus on guiding students through the most often misunderstood concepts in macroeconomics. Teaching tips advise instructors on how to best address complex topics with students.
- A completely revised test bank includes multiple choice, true/false, and short answer questions—many of which require students to perform numeric calculations or analyze data and graphs.
-  Coursepacks are available to work directly in your institution's learning management system and include flashcards, chapter summaries and review questions, conceptual tutorial animations, data plotter activities, and Country Studies Snapshot documents.
